CARE®

HEALTHY SOLUTIONS FOR A HAPPIER PET

DIAMONDPET.COM

Specialized diets designed with you and your pet in mind.

When we set out to create Diamond CARE and Diamond CARE Rx, we had one goal in mind: make specialized and prescription foods available at a reasonable price. These veterinarian-developed formulas are formulated for pets with unique dietary needs. They also provide complete nutrition, so you can feed your pet the special diet they need for as long as they need it.

The science behind beneficial nutrition.

The veterinarians and nutritionists behind Diamond CARE curated proven research, determined proper nutrient levels and carefully selected quality ingredients for each diet. Then we figured out how to make these formulas affordable without sacrificing quality or taste, because we believe every pet deserves the best. Price should not dictate whether pets with unique dietary needs get the specialized nutrition they require.

As maintenance diets, each Diamond CARE formula is safe to be fed to adult dogs or cats long-term. But just like anything concerning your pet's health, check with your veterinarian before changing your pet's diet. All formulas are intended for adult dogs or cats and should not be fed to puppies or kittens.

Family-Owned

Diamond CARE was created by a family that believes every pet deserves the very best — and every pet owner deserves a fair value when it comes to their dog's or cat's food. Using carefully selected ingredients for specialized diets and backed by proven research, we aim to take care of every member of your family.

Made in the USA

All Diamond CARE formulas are made with pride in the USA. Our priority is to find quality ingredients, whether domestic or global, to provide your pets with the food they deserve. We also make a point of forming close relationships with our suppliers after a careful vetting process.

BENEFITS IN THE BAG

LIMITED-INGREDIENT DIETS

A narrow selection of quality ingredients provides an alternative feeding option that still delivers complete nutrition in our Sensitive Skin, Sensitive Stomach and prescription Renal Formulas for Adult Dogs.

EASILY DIGESTIBLE PROTEIN

We carefully selected quality digestible protein sources, which include egg protein, potato protein, lamb meal or chicken meal. Hydrolyzed salmon is the single animal protein source in our Sensitive Skin Formula for Adult Dogs.

BROWN RICE

Easy-to-digest brown rice is the single source of grain in our Renal Formula for Adult Dogs.

CONTROLLED SODIUM LEVELS

Our Renal Formula for Adult Dogs is guaranteed to contain less than 0.25% sodium.

GRAIN-FREE FORMULATION*

As an alternative to grains, other ingredients such as potatoes and peas provide quality carbohydrates in select formulas.

GRAIN-FREE & POTATO-FREE FORMULATION**

As an alternative to grains, other ingredients such as peas provide quality carbohydrates in our Sensitive Skin Formula for Adult Dogs.

L-CARNITINE

Added to our weight management formulas, L-Carnitine helps the body metabolize fat.

OMEGA FATTY ACID BLEND

Omega-6 and omega-3 fatty acids from sources such as sunflower oil, chicken fat, eggs or flaxseed help support healthy skin and coat. Omega-3 fatty acids from marine sources are also added to all our dog formulas.

GUARANTEED PROBIOTIC STRAINS

To help support digestion and a healthy immune system, each cup of Diamond CARE adult dog and Weight Management for Adult Cats formulas provides a guaranteed amount of live, active cultures of K9 Strain® Probiotics or Viables® Probiotics. These beneficial bacteria are developed specifically for dogs and cats and are processed under strict quality and safety standards to ensure purity.

FIBER BLEND

Added insoluble fiber in our weight management formulas helps dogs and cats feel full. In other formulas, a blend of soluble and insoluble fibers in the form of tomato pomace, psyllium seed husk or dried chicory root helps support healthy digestion.

GLUCOSAMINE & CHONDROITIN

Added to our Weight Management Formula for Adult Dogs, these ingredients help support joints.

REDUCES URINE pH

A healthy urinary tract is reliant on a lower pH in a cat's urine, so our Urinary Support Formula for Adult Cats is designed to maintain appropriate acidity.

CONTROLLED MAGNESIUM AND PHOSPHORUS

Our Urinary Support Formula for Adult Cats is guaranteed to contain no more than 1% phosphorus and 0.1% magnesium.

* The facility in which this food is made also makes food that may contain other ingredients, such as grains. Trace amounts of these other ingredients may be present.

** The facility in which this food is made also makes food that may contain other ingredients, such as grains and potatoes. Trace amounts of these other ingredients may be present.

RENAL FORMULA FOR ADULT DOGS

A limited-ingredient diet for
dogs with acute or chronic
kidney disease

If your dog has been diagnosed with acute or chronic kidney disease, Diamond CARE Rx Renal Formula for Adult Dogs may be the right diet for you. Quality protein in controlled levels provides adequate amounts of essential amino acids. Phosphorus and sodium levels are carefully regulated, while guaranteed levels of antioxidants help support the immune system. And it tastes great, which makes a big difference when your dog may be experiencing some appetite loss. Diamond CARE Rx Renal Formula is a complete diet and may be fed long-term.

Controlled Levels of Easily Digestible Protein

Brown Rice Is the Single Grain Source*

Guaranteed Levels of Zinc, Selenium & Vitamin E

Controlled Sodium

Blend of Omega-6 & Omega-3 Fatty Acids

* The facility in which this food is made also makes food that may contain other grains. Trace amounts of these other ingredients may be present.

INGREDIENTS

Brown rice, chicken fat (preserved with mixed tocopherols), egg product, potato protein, tomato pomace, flaxseed, natural flavor, menhaden fish oil (a source of EPA), calcium carbonate, potassium citrate, DL-Methionine, choline chloride, taurine, dried chicory root, dried Lactobacillus plantarum fermentation product, dried Bacillus subtilis fermentation product, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dried Bifidobacterium animalis fermentation product, vitamin E supplement, iron proteinate, zinc proteinate, copper proteinate, ferrous sulfate, zinc sulfate, manganese sulfate, copper sulfate, potassium iodide, thiamine mononitrate, manganese proteinate, ascorbic acid, vitamin A supplement, biotin, niacin, calcium pantothenate, sodium selenite, pyridoxine hydrochloride, vitamin B12 supplement, riboflavin, vitamin D3 supplement, folic acid.

Contains a source of live (viable), naturally occurring microorganisms.

GUARANTEED ANALYSIS

FEEDING GUIDE

Weight (lbs.)	Standard Measuring Cups/Day
3	¼
5	½
10	¾
20	1¼
30	1¾
40	2¼
60	2¾
80	3½
100	4¼

For adult dogs over 100 pounds, add approximately ½ cup for every 10 additional pounds. This feeding guide provides a starting point for the amount of food to give your dog each day, and can vary based on factors such as activity level. Work with your veterinarian to determine an appropriate weight and adjust feeding amounts as necessary.

CALORIE CONTENT (FED)

4,300 kcal/kg (488 kcal/cup) Metabolizable Energy

NUTRITION STATEMENT

Animal feeding tests using Association of American Feed Control Officials procedures substantiate that Diamond CARE Rx Renal Formula for Adult Dogs provides complete and balanced nutrition for maintenance.

SENSITIVE SKIN FORMULA FOR ADULT DOGS

A limited-ingredient diet for dogs with food-related skin sensitivities

If your dog has skin sensitivities, Diamond CARE Sensitive Skin Formula for Adult Dogs may be the diet for you. For starters, hydrolyzed salmon is the single animal protein source. Added to that are omega-6 and omega-3 fatty acids in an appropriate ratio, as they have been shown to be beneficial to skin and coat health. Peas provide quality carbohydrates and also enhance palatability in this grain-free formulation. Finally, this specialized diet is rounded out with a limited number of select ingredients. For best results, be sure to talk to your veterinarian and limit other foods, such as treats, that could also contribute to adverse skin reactions in your pet.

Low Molecular Weight, Single-Source Protein

Limited-Ingredient Diet

Grain-Free & Potato-Free Formulation

Omega Fatty Acids for Skin & Coat Health

INGREDIENTS

Peas, pea flour, hydrolyzed salmon, sunflower oil (preserved with mixed tocopherols), flaxseed, natural salmon flavor, tomato pomace, salmon oil, dicalcium phosphate, calcium carbonate, DL-Methionine, choline chloride, taurine, dried Lactobacillus plantarum fermentation product, dried Bacillus subtilis fermentation product, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dried Bifidobacterium animalis fermentation product, vitamin E supplement, iron proteinate, zinc proteinate, copper proteinate, ferrous sulfate, zinc sulfate, manganese sulfate, copper sulfate, potassium iodide, thiamine mononitrate, manganese proteinate, ascorbic acid, vitamin A supplement, biotin, niacin, calcium pantothenate, sodium selenite, pyridoxine hydrochloride, vitamin B12 supplement, riboflavin, vitamin D3 supplement, folic acid.

Contains a source of live (viable), naturally occurring microorganisms.

SENSITIVE STOMACH FORMULA FOR ADULT DOGS

A limited-ingredient diet
for dogs with sensitive
stomachs or food-related
digestive issues

Though it may seem like it at times, not all dogs have cast-iron stomachs. This formula is built to help address your pet's sensitive stomach. A combination of potatoes and egg protein makes this limited-ingredient formula easy to digest for sensitive dogs. Psyllium seed husk, a source of beneficial fiber, helps support proper digestion, and probiotic strains that are native to the canine GI tract are added. Diamond CARE Sensitive Stomach Formula for Adult Dogs is safe for prolonged use, so if you find it helps your dog, you can keep them on it. But like anything concerning your pet's health, check with your veterinarian first.

WEIGHT MANAGEMENT FORMULA FOR ADULT DOGS

A low-fat, high-fiber diet for weight loss and weight maintenance in dogs

A few extra pounds on your dog may not seem like a cause for concern. But too much weight can be bad for their health. The good news is Diamond CARE Weight Management Formula for Adult Dogs can help address your dog's weight issue without leaving them feeling hungry. Insoluble fiber, provided by ground Miscanthus grass, helps your dog feel full, while L-Carnitine aids the body in metabolizing fat. Added glucosamine and chondroitin help support joints that may be working a little harder these days. And to make sure your dog gets all the nutrients they still need, this formula is rounded out with omega fatty acids, guaranteed antioxidants and canine-specific probiotics for digestive health. This is a complete diet, so you can feed it long-term, but always check with your veterinarian before making any changes to your dog's diet.

URINARY SUPPORT FORMULA FOR ADULT CATS

A complete and balanced diet for cats that supports urinary tract health

A healthy urinary tract can make all the difference in your cat's happiness. Diamond CARE Urinary Support Formula for Adult Cats reduces urine pH to promote good urinary tract health and provides a complete and balanced everyday diet. This formula also features controlled levels of magnesium and phosphorus. Your cat will get guaranteed levels of omega-6 and omega-3 fatty acids for a shiny coat and healthy skin, and antioxidants for immune support. Just as you would with any health concern, be sure to consult your veterinarian before making a change to your pet's diet.

Reduces Urine pH
